

## Review Form 1.7

Journal Name:	<b>International Journal of Plant &amp; Soil Science</b>
Manuscript Number:	<b>Ms_IJPSS_103632</b>
Title of the Manuscript:	<b>Soil Properties of Barley (Hordeum vulgare L.) Crop as Affected by Zinc-Based Fertilizers in Saline Conditions</b>
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript) Yes. But the MS should be improved.</li> <li><b>Is the title of the article suitable?</b> (If not please suggest an alternative title) No, please improved as comment.</li> <li><b>Is the abstract of the article comprehensive?</b> No, please improved as comment.</li> <li><b>Are subsections and structure of the manuscript appropriate?</b> Yes.</li> <li><b>Do you think the manuscript is scientifically correct?</b> Yes.</li> <li><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> -</li> </ol> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p><b>Comments for Ms_IJPSS_103632, Soil Properties of Barley (Hordeum vulgare L.) Crop as Affected by Zinc-Based Fertilizers in Saline Conditions.</b></p> <ol style="list-style-type: none"> <li>This experiment's treatment did not compare with and without salinity (in soil). Please edit the writing, especially the title, abstract conclusion, objective in introduction, and so on, to avoid over-clamming. The salinity of soil property can simply be highlighted in the experiment's Materials and Methods.</li> <li>Some data appear to be different with control in the results of Table 2-4. Please clarify a post hoc test in these tables for better explanation. Please specify which macro/micronutrients and microbials (bacteria, fungi, and actinomycete) can be induced by which zinc application in the experiment. The data can then be summarized in Abstract and Conclusion sections.</li> </ol>	
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>		
<p><b>Optional/General</b> comments</p>		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
