PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. It is quite important, especially related to the effect of the climate change</p> <p>2. The author may change the title (more appropriate), for example : The effect of the climate change looming for Indian summer monsoon</p> <p>3. Quite comprehensive</p> <p>4. Quite appropriate</p> <p>5. Yes</p> <p>6. Actually, the author can use the newest research, for example 3-5 years latest.</p> <p>Additional comments :</p> <p>1. The author have to delete the last paragraph of the introduction (below), because it makes longer and redundant. "The 6th Assessment Report of the Inter: Governmental Panel on Climate Change, released on August 9, 2021, observed that climate change is widespread, rapid, and intensifying (IPCC, 2021). The 6th IPCC report reported that emissions of greenhouse gases from anthropogenic activities are responsible for approximately 1.1°C of global temperature rising about since last century and finds that averaged over the next 20 years, earth's temperature is expected to cross 1.5°C of warming (IPCC, 2021)."</p> <p>2. In my opinion, you have to make some words shorter and on point. Please check it again.</p> <p>3. Be careful on grammar, word selection, space, comma and full stop.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, however the author can improve some vocabs. In my opinion, some words of your article do not use the scientific word, for example : dizzyingly, interplay.</p>	
<p>Optional/General comments</p>
