PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper is a KAP Study in fact and the authors have gathered some information about approaches of young people toward contraceptions. Unmet needs for contraceptions among unmarried youths and also some cultural resistances are the issue. It needs some explanations at the following parts: Total population of the study site and also enrollment of volunteers into study; reference for 50% death due to tuberculosis and HIV ; a little doubt about reference No. 23; report of 30-40% maternal mortality due to abortion is too high and as studies show the abortion death has been declined nowadays by medical abortion. Over all, this study is acceptable with minor revision.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
