Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>YES</p> <p>YES</p> <p>COMPLIANCE WITH MEDICATIONS AMONG RENEAL PATIENTS</p> <p>YES</p> <p>YES</p> <p>YES ,BUT AUTHOR SHOULD INCLUDE SOME CURRENT IN REFERANCE</p> <p>DISCUSSION PART NEED TO ADD MPRREFERENCESS</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>YES</p>	
<p>Optional/General comments</p>	<p>Title: Review Comments - Compliance with Medications among Renal Patients</p> <p>Inclusion of Current References: The author has done an excellent job discussing the topic of medication adherence in renal patients. However, current references must be included in the study to guarantee that the material offered is current and relevant. Incorporating contemporary studies and conclusions will increase the research's credibility and usefulness.</p> <p>Improvements to the Discussion Section: The discussion section should include more references to back up the assertions and findings stated. To compare and contrast the results and put the current findings into context, it is critical to refer to prior research and studies in the subject. The discussion will become more extensive and well-rounded as a result.</p> <p>MPR (Medication Possession Ratio) Bibliography: It is suggested that references or information on Medication Possession Ratio (MPR) be included in the study. MPR is an important indicator for assessing medication adherence that could offer great value to the research. Incorporating MPR references and explaining its consequences on medication adherence among renal patients will improve the study's relevance and thoroughness.</p> <p>Overall, the author has made an excellent attempt to investigate the problem of medication adherence among renal patients. However, include recent references and greater support in the discussion section, particularly mentioning MPR, is strongly encouraged to increase the study's quality. By addressing these issues, the study will provide useful insights into drug adherence in this unique patient population.</p> <p>Discussion Portin requires to add some research and comparison to the current work.</p>
