<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes. I think that the manuscript is important for the scientific community as a comprehensive epidemiological review of the subject.</p> <p>2. Yes. Title is ok. Eventually we can propose (not mandatory): Bacterial dermo-hypodermatitis (BDH) in Ziguinchor (Senegal): a 2-year review.</p> <p>3. Yes. Abstract is comprehensive but needs some minor revisions: The aims of our study were to determine the epidemiological, clinical, and therapeutic and outcome of bacterial dermo-hypodermatitis, and also as well as to identify the eventual associated risk factors. associated with BDH. Bacterial dermo-hypodermatitis is common in Ziguinchor, and predominantly affects adult males, contrary to the predominance of males females in the literature. Cardiovascular associated risk factors such as obesity and arterial hypertension were the most common.</p> <p>4. Yes.</p> <p>5. Yes. However, I believe that we should have an additional demographic summary data table as well as for the results.</p> <p>6. Yes.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes. Some improvements are necessary – they will be detected easily after a new reading from the authors.	
<p>Optional/General comments</p>	Some spaces are required in the paragraphs. This will allow a better reading – but this can be corrected by editing process.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	(If yes, Kindly please write down the ethical issues here in details)
