

Editor's Comment:

I reviewed the above manuscript and I am of the view that the manuscript still require minor corrections before being accepted.

1. Agreeing with the reviewer, Sas, the authors should attend to the referencing style to conform with the journal's requirements. The style should be consistent written.
2. The objectives of this study are not clearly stated.
3. The authors should explain in the 'Materials and Methods' section how the economic analysis approach was undertaken.

Editor's Details:

Dr. Langa Tembo
