	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The study emphasized the importance of patient education and patient-centered care to improve healthcare-seeking behavior among CKD patients. It also highlighted the need to address the financial challenges faced by patients to ensure equitable access to healthcare services. These findings could help healthcare providers and policymakers develop interventions to improve CKD management and patient outcomes in Ghana and similar settings.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>Participants with higher levels of education tended to have a better understanding of their condition. The relationship between patients and healthcare providers played a significant role in healthcare-seeking behavior, with positive relationships leading to better engagement and communication. The study also highlighted the financial burden as a significant barrier to healthcare-seeking behavior among CKD patients. Many participants struggled to afford dialysis and other treatment costs, which affected their access to care.</p>	
Optional/General comments
