

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_104785
Title of the Manuscript:	Effect of Bio-fertilizers and Zinc levels on Growth and Yield of Pearl millet (Pennisetum glaucum L.)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1.This paper aims to find out the best combination of biofertilizer and zinc level for Pearl Millet growth and yield. The biofertilizer fix the nitrogen from the atmosphere and supply them to the plants. They solubilize the insoluble nutrient forms into available forms, and they make soil more productivity. The application of biofertilizer is cost effective and ecofriendly alternative to chemical fertilizers. Therefore, this study is important for scientific community.</p> <p>2. The title is suitable.</p> <p>3. Objective is missing in abstract.</p> <p>4. Although subsections and structure are appropriate, the author didn't explain why this research is done or research significant and the objectives. Moreover, there is how importance of biofertilizers in crop production, pearl millet or why this is needed to study.</p> <p>5. Although it is quite scientifically correct, there is no data analysis in the material and method. The author did not describe how they calculate. It is better to use mean comparisons in treatments. In the conclusion, it should be adding more information.</p> <p>6. References in the text and reference parts are not synchronized. The author should make correct.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language is good, but the writing styles are the same in all parameters. It should be change or upgrade.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
