

## Review Form 1.7

Journal Name:	<b>Journal of Advances in Mathematics and Computer Science</b>
Manuscript Number:	<b>Ms_JAMCS_104359</b>
Title of the Manuscript:	<b>Some Fixed Point Results on Boyd-Wong Type Generalized <math>(\alpha, \psi, F)</math>-Geraghty Contraction Mappings in Partial Metric Spaces with Application</b>
Type of the Article	<b>Original Research Article</b>

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  <b>1. Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)  <b>2. Is the title of the article suitable?</b> (If not please suggest an alternative title)  <b>3. Is the abstract of the article comprehensive?</b>  <b>4. Are subsections and structure of the manuscript appropriate?</b>  <b>5. Do you think the manuscript is scientifically correct?</b>  <b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b>  <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	<b>1- Yes! The paper presents an investigation of generalized Boyd-Wong contraction mappings in the configuration of partial metric spaces, and we investigate the existence and uniqueness of fixed points for the newly constructed contraction mappings. The results show that a class of nonlinear integral equations has a solution.</b>  <b>The paper presents an investigation of generalized Boyd-Wong contraction mappings in the configuration of partial metric spaces, and we investigate the existence and uniqueness of fixed points for the newly constructed contraction mappings. The results show that a class of nonlinear integral equations has a solution.</b>  <b>2- Yes!</b> <b>3- Yes!</b> <b>4- No! A section of final considerations or conclusions must be inserted in the paper.</b>  <b>5- Yes!</b> <b>6- Insert latest references</b>	
<b>Minor</b> REVISION comments  <b>1. Is language/English quality of the article suitable for scholarly communications?</b>	<b>Grammar and punctuation must be corrected !</b>	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
