Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> It's becoming increasingly common for countries to implement data-localization policies, but unfortunately, this can have negative consequences for trade, productivity, and prices in affected industries. It's important for nations with similar values to work together to prevent this trend from continuing and instead create a digital economy that is open, based on rules, and encourages innovation. It is an important issue. I've been working on a manuscript for quite some time now, and I have to say, the title I came up with has seemed good from the very beginning. It's catchy, memorable, and it really captures the essence of what I'm trying to convey in my writing. Of course, there's still a lot of work to be done before I can confidently say that the manuscript as a whole is ready for publication, but I feel like I'm off to a great start with the title. It's always so satisfying when you can nail that one perfect phrase or word that encapsulates everything you're trying to say. The abstract of the article is comprehensive and provides a detailed overview of the research that was conducted. The authors have done an excellent job of synthesizing the data and presenting it in a clear and concise manner. The abstract is well-organized and easy to follow, making it a valuable resource for researchers and students alike. Overall, this article provides a thorough analysis of the topic and offers important insights that will help to advance our understanding of the subject matter. The structure of the manuscript is satisfactory. The manuscript appears to be scientifically accurate and well-researched. The author has presented their findings in a clear and concise manner, and has supported their conclusions with appropriate data and analysis. Overall, it is a well-written and informative piece of work. I noticed that the references provided in the document are sufficient, although some are not in the same format. It would be helpful to revise the reference section with special emphasis on the format, ensuring that all references follow a consistent and appropriate format. This will make it easier for readers to access and understand the sources cited in the document. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>The manuscript's English language is quite poor, with numerous spelling and grammar errors. It's important to double-check the entire manuscript to ensure that it's as polished and error-free as possible.</p>	
<p>Optional/General comments</p>	<p>The issue of information protection in India has become a pressing concern, and there is a growing need for a legitimate and effective legal system to address it. It is essential that individuals and organizations are able to safeguard their sensitive data and personal information, and that there are clear laws in place to prevent unauthorized access and misuse. This is a complex issue, and it will require careful consideration and collaboration between experts in the field, policymakers, and legal professionals to develop an effective solution.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
