

Editor's Comment:

Based on the recommendations of both the reviewers, manuscript may be accepted for publication in JABB.

However, upon going thru the manuscript, I found certain mistakes in the revised manuscript. For example, in the Abstract itself:

The opening two sentences under 'Aim' : This study was carried out by analyzing the quantitative and qualitative of the biogas produced from cow dung by degrading mechanism. 32L of bioreactors was used for the study.

These look to be incomplete sentences. In my opinion, these must be as :

This study was carried out by analyzing the quantitative and qualitative parameters of the biogas produced from cow dung by degrading mechanism. A 32L capacity bioreactor was used for the present study.
