

**Editor's Comment:**

This review paper is of practical concern and provides valuable technical in formations.

Yet, as suggested by one of the Reviewer, this paper still lacks from a substantial discussion that would have potentially challenged the apparently one-way presentation of advantages of Biochar.

This, indeed, is acknowledged by the Author himself who duly suppress any reference to such a discussion in the Abstract.

Nevertheless, this Review paper is, besides, well-constructed and sufficiently informative to be acceptable for publication in IJECC.
