

**Editor's Comment:**

Editorial decision on the peer-reviewed manuscript entitled "Role of Primary Health team in promoting mental health of adolescent students: A systematic review" submitted to the International Neuropsychiatric Disease Journal.

Apart from some minor problems with typesetting, reference checking and linguistic editing, the manuscript is complete in every respect. In my opinion, the manuscript focuses on a relevant topic and can contribute significantly to the field of knowledge to which it relates.

I recommend the acceptance of the manuscript in its current form after making minor modifications.
