

Review Form 1.7

Journal Name:	Asian Journal of Research in Computer Science
Manuscript Number:	Ms_AJRCOS_109731
Title of the Manuscript:	ChatGPT: Early Adopters, Teething Issues and the way forward
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes but very less research work found</p> <p>Yes</p> <p>Yes</p> <p>No revisions suggested</p> <p>Needs revisions</p> <p>No</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Needs improvement</p>	
<p>Optional/General comments</p>	<p>(1)Add some more results in the paper (2)Author should add contributions in the last of the introduction or in the last of materials and methods section. (3)All tables and figures should be explained clearly. (4)As paper lacks to include the latest papers, these papers must be added- -Using affective criteria in the decision-making of cognitive agents on flexible passenger transportation domain -Multi-objective workflow scheduling scheme: a multi-criteria decision making approach -Application of decision making model for leakage reduction to economic project in water distribution systems -Multi-attribute decision making for power Dombi operators under Pythagorean fuzzy information with MABAC method -Service selection using fuzzy multi-criteria decision making: a comprehensive review -Spherical fuzzy Dombi aggregation operators and their application in group decision making problems -Research on information system assets risk assessment and defense decision-making -Bid evaluation decision for major project based on analytic hierarchy process and data envelopment analysis cross-efficiency model -A Nash equilibrium based decision-making method for performance evaluation: a case study -A novel intelligent deep learning predictive model for meteorological drought forecasting -A fuzzy adaptive symbiotic organism search based hybrid wavelet transform-extreme learning machine model for load forecasting of power system: a case study -Multivariate long sequence time-series forecasting using dynamic graph learning -Integration of RNN with GARCH refined by whale optimization algorithm for yield forecasting: a hybrid machine learning approach -BiLSTM model based on multivariate time series data in multiple field for forecasting trading area</p>
