	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This topic is of Moderate interest and will prove beneficial for our further understanding of this well known post thyroidectomy complication and guide us to be well versed with the risk factors predisposing the patient for the same.</p> <p>It is suitable, slight Grammatical correction</p> <p>Yes</p> <p>They need modifications , They ought to be crisp and to the point. The concerned author seems to have copy pated his thesis . He needs to modify his results and discussions to make them well articulative. There are few mistakes . e.g in introduction it should be devascularisation not revascularization(typing error I suppose)</p> <p>It is not well written, needs to be modified and made by the standards. Results should be depicted in a better way</p> <p>Too much references, latest one the author has cited is of 2013. A lot of research has been done in this topic from 2013 onwards which is missing in his references</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Fair	
<p>Optional/General comments</p>
