

Review Form 1.7

Journal Name:	Asian Journal of Research in Zoology
Manuscript Number:	Ms_AJRIZ_110529
Title of the Manuscript:	PRECLINICAL ASSESSMENT OF WOUND HEALING AND ANTI-INFLAMMATORY ACTIVITIES OF EICHHORNIA CRASSIPES IN WISTAR ALBINO RATS
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript is important for scientific community to assist in the identification of plants with pharmacological value.</p> <p>The title is suitable.</p> <p>The abstract lacks background information about the manuscript. The background section should be provided. Subsections of the manuscript are appropriate</p> <p>The manuscript is scientifically correct.</p> <p>The references are okay.</p> <p>The tense used throughout the manuscript should be reviewed. In the plant collection and drying subsection: Provide the place where plant identification took place and specify how the plant was transported to the facility. Provide the storage conditions and place of storage after grounding into powder before use. Provide information on the process of drying the extract and its preparation into different concentrations for use.</p> <p>In the preliminary phytochemical Analysis subsection specify the phytochemical tests conducted and the methods used.</p> <p>In the Animal procurement subsection provide information on the sex of the animals used.</p> <p>In the acute toxicity studies check for repetition.</p> <p>In the evaluation of wound healing activity provide information on administration of anaesthetic agent used. Provide the complete formula for % wound contraction, the one provided is not elaborate. Check if there is a bracket missing in the formula for percent inhibition.</p> <p>In the results section 3.1 subsection check the spelling of phytochemical Analysis.</p> <p>In the conclusion section check the scientific name of the plant and write in italic</p>	
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>The language is suitable for scholarly communication but the tense has to be corrected throughout the manuscript.</p>	
<p><u>Optional/General</u> comments</p>	<p>The manuscript needs a review on the tense, addition of background information in the abstract and highlighted areas to be addressed.</p>
