	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes it is as the study can show the reason of LGA baby however there no new input to the known facts.</p> <p>Yes</p> <p>No.</p> <p>There are missing subsets in the manuscript</p> <p>There are very old references. I think it would be better if recent publications (within 5 years publication) were used.</p> <p>Vaguely incomplete research paper, does not contain all the components, no sample size calculation, graph plotted does not match the description, unrelated description in introduction, no clear cut methodology. Small sample size, not inclusion and exclusion criteria, there is no explanation what only certain maternal age and gestational age is taken as sample. There are multiple bias present.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	yes	
<p>Optional/General comments</p>
