Type of the Article	Case report

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Thank you for choosing me as a referee for this report</p> <p>First, the writing should be revised by a native in terms of writing and grammar</p> <p>Abbreviated words should be mentioned in the text for the first time</p> <p>The story written in the report section is incomplete:</p> <p>Was this case referred for abdominal pain or for chemotherapy!?</p> <p>In writing the case, it is important to use the standard CARE checklist. The patient's history, medical and hospitalization records, medical examination findings, tests and radiology report should be interpreted. Because this case is written for all health and fitness groups and must be complete in every way.</p> <p>In the PET CT report, have they reported hypermetabolic "lymph nodes"?</p> <p>What was the result of the treatment? In what condition was the patient discharged?</p> <p>How long was the hospitalization?</p> <p>Regarding the discussion, it is suggested that the reason why this case is novel should be clearly written and if there are similar cases printed with this case, it should be briefly compared with them.</p> <p>Is there a relationship between the pathophysiology of the underlying disease and neuropathy?</p> <p>This article does not have a good reference! Every sentence that is written and extracted from other articles should have references and should be written in journal style. Except for the case references, the other references must be from the last 5 years.</p> <p>The conclusion should be based on how to diagnose and choose the treatment process.</p> <p>At the end, after the said revision, the abstract should be written.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Revision requirement.	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
