Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. Current increasing rate of C- section and decreasing rates of NVD are because of many factors for eg. Small families so patients want less risk , good antenatal surveillance so increased diagnosis of abnormal Doppler before delivery and last but not the least increased chances of Medico Legal cases.</p> <p>A review of current trends in Deliveries :rising rates of Cesarean Section versus decreasing rates of Normal Delivery.</p> <p>Yes</p> <p>According to me , order of indications of elective caesarean section can be rearranged, as I have edited, according to the commonality. Maternal Request should be last indication, medically.</p> <p>Yes</p> <p>Yes</p> <p>Few suggestions:</p> <ol style="list-style-type: none"> 1. More technical/ medical terms need to be used. 2. Few corrections have been made (highlighted) 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is OK. Can still be improved.</p>	
<p>Optional/General comments</p>	<p>In Conclusion: Probable reasons for increase in Cesarean sections can be elaborated like</p> <ol style="list-style-type: none"> 1. Increase previous Cesareran sections and previous 2 ceasarean section patients 2. Increased fetal medicine specialists and increased antenatal surveillance means early diagnosis of Doppler abnormalities in umbilical artery or middle cerebral artery changes , increased cord around neck.. etc. 3. Increased incidence of infertility / IVF conceived patients 4. Increased incidence of maternal age & other pregnancy related complications lik gestational DM & Pre eclampsia. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
