<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. Language is acceptable</p>	
<p>Optional/General comments</p>	<p>My only concern is CDC does not recommend testing for Ig M as this wont be useful in the management of patients at the bed side or in the clinic, except for understanding the prevalence. In addition, it may be useful to also present whether the patients with elevated ig M levels had any clinical manifestation and what kind of manifestations</p>
