Title can be slightly modified by highlighting the Tools used for the analysis. The Abstract must bring the research gaps in the particular study area. Ok Scientifically correct Most of the journals are published in recent years and its appropriate As the analysis of quality of ground water is meant for Agricultural pollution, the analyse must be made on Sodium Absorption Ratio (SAR) and the 'salinity' condition must be examined clearly to classify the quality of ground water suitability for Irrigation activity in the study area. Why Battelle environmental system is not implemented for the detailed analysis over the ground water samples?
