**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>On the whole, the research topics is interesting and it requires some improvements, e.g. lack of critical discussion in the results and discussion part. I recommend acceptance after addressing the following issues:</p> <ol style="list-style-type: none"> <li>1. The title needs to improve.</li> <li>2. The abstract must provide enough a brief overview of the paper. Here, the abstract is not telling what actually in the main text. Thus, it should be re-written and should be to the point. What the problem is, what you did to solve it and what the results are and why are important?</li> <li>3. The abstract provide an introductory sentence indicating why it was important or necessary to do the work. Justify the work.</li> <li>4. The abstract also provide a summary sentence indicating the importance of the results.</li> <li>5. In the introduction please mention the objectives of your work and reference updated with recent studies.</li> <li>5. In the results and discussion, there is nothing explanation about Table 3 and Figure 1. There is no clear comparison in terms of values.</li> <li>6. Related Literature is very poor and should be rewritten and improved. I can't see the related work section? Thus, please provide several solid literature reviews (discussion and argument). Prefer to be updated with recent studies.</li> </ol>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	I recommend acceptance the paper after addressing the above compulsory revisions, otherwise the paper will be rejected.
