<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes Article contains holistic approach to educational system, emphasizing not only mastery of content but also the development of essential skills required in teaching - learning process. The results of this study show that inclusive teaching methods can positively transform the students learning of mathematics and biology. It has dimension not only educational but also academical and scientific, for example in the area of diactics of biology and mathematics.</p> <p>2. Yes</p> <p>3. Yes</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. Yes, but I suggest adding 2-3 newer publications (after 2023) in the theoretical part or discussion of research results.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes. The language is not always perfect, the syntax is in some parts a bit convoluted. But generally, it is understandable enough to consider the text as suitable for scholarly communications.</p>	
<p>Optional/General comments</p>	<p>1. I think it will be more clear for readers if the authors add the objective after introduction (although the objective is included in the abstract - it is still just an abstract).</p> <p>2. The aims, background and research methodology are clearly described. But I cannot see research problem. I suggest to add it in chapter 4.0 Methodology.</p> <p>3. The scientific results of the thesis are undoubted.</p> <p>4. Findings are useful for educational, pedagogical, social environments.</p> <p>5. Implications and recommendations of findings are clear and useful.</p>
