

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_110345
Title of the Manuscript:	MILLETS: A TASTY SOLUTION TO FOOD SECURITY CHALLENGES OVER CEREAL-BASED CROPPING SYSTEMS
Type of the Article	Short Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Enhancing millet production, that cereal with many nutritional benefits, holds significant importance within the scientific community and global agricultural discourse,</p> <p>2. Yes, it highlights the significance of millets in addressing food security challenges while contrasting them with cereal-based cropping systems. I suggest also this title "Millets: Nourishing Solutions for Sustainable Food Security", but the author title is good as well.</p> <p>3. Yes, the abstract covers various aspects, including the global recognition of millets as 'superfoods,' their significance in different regions, and the potential of millets in promoting sustainable agriculture and enhancing food security.</p> <p>4. No, I would like to see more sub-sections, not to get lost while reading.</p> <p>5. Overall, it appears to be scientifically well-supported by facts and data (except for bibliography).</p> <p>6. Actually no, that's what I meant in the 5th question, these references contain valuable information and data related to plant physiology, drought tolerance, cultivation, and genomics, but, they might not directly align with the central theme of this manuscript regarding millets impact on food security and sustainable agriculture.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The summary is well-articulated, uses appropriate academic language, the vocabulary is academic and technical, which is appropriate for scholarly writing.</p>	
<p>Optional/General comments</p>	<p>This is a very interesting research paper.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
