(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, It supports the importance of CT screening in this high-risk population.</p> <p>THE SERO-PREVALENCE OF <i>Chlamydia trachomatis</i> AMONG HIV PATIENTS AND HEALTHY FEMALE VOLUNTEERS IN PORT-HARCOURT, RIVERS STATE.</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Is it important that they mention what type of ELISA they used and what Cut-off values for positive results? What assay did they use to detect antibodies against HIV patients? What variables were considered as risk factors, the methodology only mentions some (participant's age, healthy volunteers, etc), but it is important to know all of them (education marital status, employment status, use of condoms, lifetime number of sexual partners, etc).</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The submission necessitates significant English editing and thorough review of the data by an epidemiologist to ensure the soundness of interpretations, especially concerning causal-effect relationships</p>	
<p>Optional/General comments</p>
