(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. This study is devoted to the current topic - the increase in safety climate, which is associated with dangerous behavior at work. It is the medical industry that is very vulnerable in this direction. The questionnaire received a fair number of respondents - 277 responses from several healthcare facilities in Benin City. Based on the survey, the author presented a model based on multiple regression analysis, which is also correct in these studies.</p> <p>2. The title of the article is correct</p> <p>3. Yes, the abstract is comprehensive</p> <p>4. Subdivisions and structure correspond to the manuscript</p> <p>5. The links are correct</p> <p>6. And since this study is aimed specifically at management personnel engaged in safety monitoring, it should, in our opinion, be noted in more detail how exactly this study can inspire healthcare management to promote safe behavior and successful safety monitoring of workers in this field. As for the dangers at workplaces in the field of healthcare, it would be appropriate to provide some data specifically at those workplaces.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is written in incompetent English</p>	
<p>Optional/General comments</p>	<p>But the comments made do not reduce the scientific and practical value of the manuscript as a whole. It contains the original results and can be published in the open press after making the specified corrections..</p>
