

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_110859
Title of the Manuscript:	Perspectives on Climate-Smart Agriculture towards Sustainable Food Production
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>By promoting sustainable productivity, income growth, and resilience while mitigating greenhouse gas emissions, CSA emerges as a catalyst for positive change. Its impact on various SDGs is a testament to its comprehensive and integrated approach, marking a paradigm shift in sustainable agriculture and food security. Well defined.</p> <p>Good selection of title and well organised cum structured manuscript. Yes it is scientifically accepted . Good enough references.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Good usage of vocabulary,</p>	
<p>Optional/General comments</p>	<p>Climate-smart agriculture stands as a groundbreaking and sustainable solution that transcends traditional paradigms. Its unique ability to concurrently address climate change, enhance food security, and bolster nutrition makes it an indispensable tool for achieving the Sustainable Development Goals (SDGs). By promoting sustainable productivity, income growth, and resilience while mitigating greenhouse gas emissions, CSA emerges as a catalyst for positive change. Its impact on various SDGs is a testament to its comprehensive and integrated approach, marking a paradigm shift in sustainable agriculture and food security. In a world grappling with a changing climate, embracing CSA is not just a strategic move; it is a cornerstone for building resilient and sustainable agricultural systems.</p>
