Compulsory REVISION comments	Need to correct all grammatical and punctuation errors. Clarify the history and reason for shock.	
Minor REVISION comments	If can rethink of the flow of the text in a better way, it would be more appropriate.	
Optional/General comments	Dueodenal and pancreatic injury following blunt trauma is not uncommon to publish as a case report. If there is difference in management it could have being discussed, but no such aspect noted. Flow of the information is not clear, thus if considered for publication I would suggest this need to be re-edited.
