

Editor's Comment:

The following must be considered to accept the manuscript:

The text says as follow: "Preoperative coronary angiography was normal". , but below says:

The availability of coronary angiography in our context did not make it possible to check the coronary status

This sentence is conflicting; it must be clarified.

The reviewer requested: "Use full forms instead of "AI " . PHT Pressure half time instead half time pressure etc" but the manuscript have no changes at all.

The manuscript must be corrected before the acceptance.
