EDITORIAL COMMENT'S on revised paper <i>(if any)</i>	Authors' response to editor's comments
1. It critically lacks the discussion component. I strongly recommend the author to introduce a separate section and discuss the findings through the lens of previous studies in the area. The findings and the potential contribution of the study to the literature must be emphasized.	We thank the comments. We argue that we have discussed those aspects implicitly in the introduction. To make those discussions more clearly, we have one paragraph to emphasize contributions of this manuscript.
