PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	INTRODUCTION 1- The authors were well detailed quantitatively on rice production. So, as the research justification is the need to increase rice production, through the selection of more robust varieties. Thus, they can make an actual production and consumption relationship and projections. RESULTS AND DISCUSSION 2 I suggest changing the order of tables: table 1 be table 2 and viser versa. 3- Authors should pay attention to pagination, that is, remove blank pages or that page breaks 4- It was not clear which methodology was used for the results in Table 4. 5- Data from analysis of variance were not presented	
Minor REVISION comments	6- If possible, update the references or 70% of the references used in the work were published in the last 5 years.	
Optional/General comments	Review journal guidelines for citation of in-text references and list of references
