

Editor's Comment:

Accepted after the revisions listed under

- the article needs correction of the English language
- the Abstract should refer to the presented case, and not to generalities on the topic
- the author should specify the clinic where the described intervention took place, and the time as well
- the ethical aspects should be addressed (ethical approval provided by the institutional committee)
- some specifications are required regarding the equipment used (manufacturer, country of origin) and the technical setting of the device for the mentioned treatment
- a very interesting aspect for the readers concerns the anesthesia: was it performed for the case? Does the use of the Laser device make the anesthesia unnecessary? The authors should mention this
- the titles of the figures must explain more clearly what they represent. The figures should be cited in text
- in the Discussion section the author should also discuss about similar cases in the literature
- the Conclusion section should refer strictly to the presented case, and not to generalities in the literature
- many of the References are not cited in text. The author should cite all the 10 References mentioned at the end of the manuscript
- the References style should follow the recommendations of the Journal.
