

## Review Form 1.7

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_95828
Title of the Manuscript:	Influence of Amino acids and Trace elements on L-lysine Production by Bacillus species isolated from Nigerian soil
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalacri.com/index.php/ACRI/editorial-policy>

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory REVISION</b> comments</p> <ol style="list-style-type: none"> <li>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li>3. <b>Is the abstract of the article comprehensive?</b></li> <li>4. <b>Are subsections and structure of the manuscript appropriate?</b></li> <li>5. <b>Do you think the manuscript is scientifically correct?</b></li> <li>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<ul style="list-style-type: none"> <li>• The manuscript is important for scientific community.</li> <li>• The authors want to assess the effect of some amino acids and trace elements on L-lysine production from by two Bacillus species that was isolated by the authors formerly from Nigerian soil. They want to know some appropriate conditions to increase the yield of L-lysine production by Bacillus species.</li> <li>• The title is suitable.</li> <li>• The abstract of the article is comprehensive.</li> <li>• The subsections and structure of the manuscript are appropriate.</li> <li>• The manuscript is scientifically correct.</li> <li>• The references sufficient and recent.</li> </ul>	
<p><b>Minor REVISION</b> comments</p> <ol style="list-style-type: none"> <li>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>	The language is understood.	
<p><b>Optional/General</b> comments</p>	<ul style="list-style-type: none"> <li>• Generally, the manuscript is properly structured and understood.</li> <li>• The name of microorganisms should be italicized.</li> <li>• There are some corrections which I did (yellow color) and deletions (red color) in the attached file.</li> </ul>	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
