

**Editor's Comment:**

Asian Journal of Agricultural Extension, Economics & Sociology

have gone through the original manuscript, reviewers comments and as well as revised manuscripts. For me the manuscript is very well written with enough supporting evidence however, with less data. It would have been nice to add data on a few more aspects. However, It may be accepted as such what has been submitted to the journal as revised manuscript and it will enhance the knowledge of readers on a very important aspect of problems and losses faced at household milk production level. So, the government may form some policies in this regard.

My decision regarding this manuscript entitled "Assessment Of The Current Status Of Milk Production And Farm-Level Milk Losses Among Smallholder Dairy Farmers In Mogotio Sub-County, Baringo County" is yes and Accepted.
