PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	1. This work is important to the scientific community. However, there are deficiencies in the content and some parts of the article. For example, the literature on the subject of the study is not given in the introduction part of the article. Likewise, the findings were not sufficiently discussed with the literature findings. When these deficiencies are completed, it will contribute more to science. 2. The title of the article is suitable. 3. The abstract of the article is written according to the journal format. 4. Material and method and discussion section should be rearranged. 5. I think the manuscript is scientifically correct. 6. The literature on the subject of the study is insufficient. More literature on the subject should be added.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	The language/English quality of the article is suitable for scientific communication.	
Optional/General comments	The introduction and discussion section of the article should be rearranged with the literature findings. The subject of the article is original. It will contribute to scientific studies. The article can be published after the above mentioned deficiencies are completed.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
