PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Pruning on <i>Manihot esculentus</i> C. is popular in the process of growing and forming roots. So, beside studying of regrowth and the presence of diseases, need to note more in forming roots of these pruned objects. Part Abstract should be leaned, not be illustrated with T0, T1, T2, 50 per treatment... Part Methodology need to show more in detail such as: the way of pruning, estimate the presence of diseases... Illustrated images should be showed clearly such as the infected leaves of plants... Part Statistic is rather well. References did not showed consistently. Note the text highlight colour words.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?		
Optional/General comments	Studying more on pruning and forming roots.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
