Manuscript Number:	<b>Ms_AJCRS_96753</b>
Title of the Manuscript:	<b>ACUTE INTESTINAL NECROSIS IN COVID-19 PATIENT: REPORT OF A CASE</b>
Type of the Article	<b>Case report</b>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajcrs.com/index.php/AJCRS/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p><b>1. Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p><b>Is the abstract of the article comprehensive?</b></p> <p><b>2. Are subsections and structure of the manuscript appropriate?</b></p> <p><b>3. Do you think the manuscript is scientifically correct?</b></p> <p><b>4. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> <b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>Although several cases with intestinal ischemia have been described the authors present a case with quick deterioration and dismal ending</p> <p>The title is suitable</p> <p>It is comprehensive but the discussion should be omitted and the authors should stress the severity of the case and the dismal ending in the ICU</p> <p>The text of the case is difficult to follow. It should be reorganized starting from the past to the admission and the ending in the ICU.</p> <p>The authors should explain if the first episode one and a half months ago was separate (negative PCR) or the patient has a prolonged infection resulting in intestinal necroses</p> <p>M.Hirotsugu, et al Acute intestinal necrosis due to multiple thrombosisin COVID 19 patient. Report of a case Surgical Case Reports 2022 PMID 35852719 This article will help the authors better organize there case</p> <p>Mohadeseh ZM, et al Bowel necrosis associated with COVID-19 pneumonia: A report of two cases Radiology case reports 2021;16:819-23</p> <p>Peshevska-Sekulovska M, et al. Gastrointestinal Ischemia-Stublign stone in COVID-19 patients. Gastroenterol Insights 2022;13:206-17</p> <p>Clinical picture should be presented in more detail Laboratory findings like blood gases should be presented in more detail pointing towards the severity of the case.</p>	
<p><b>Minor</b> REVISION comments</p> <p><b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>The text of the case is difficult to follow and the quality of language needs improvement As with the discussion the authors need to follow one of the cases presented recently to better organized it</p>	
<p><b>Optional/General</b> comments</p>		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
