

Review Form 1.7

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_95624
Title of the Manuscript:	Effective Teaching of Teachers, Self-Regulation, and Study Habits among Students: Structural Equation Model on Learning of Filipino
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. This study is a significant for students because it improves an individual's ability to self-regulate and to gain (or regain) a sense of control over one's own learning to obtain a high level of learning process.</p> <p>2. I recommend the following title: Structural Equation Modelling Analysis of the relationships among Philippine Students' effective Teaching of Teachers, Self-Regulation, and Study Habits</p> <p>3. The abstract is clear and comprehensive since it shows the aim and the major instruments used in this study. It also focuses on the major results and findings.</p> <p>4. The study lacks some important topics like literature review and previous studies. Self regulation plays an important role in this study and a historical background about this approach in relation to the previous studies should be given in advance. This is important to compare the results in this study with the results of other studies.</p> <p>5. I think this manuscript follows the scientific procedures using the statistical results to obtain the findings, particularly the Structural Equation Model was used to investigate the causal relationship between and among effective teaching, self-regulation, and study habits.</p> <p>6. The references are somewhat sufficient and recent as far as they are concerned with the study itself.</p> <p>7. The researcher did not provide any samples of the questioner given to the students. This is an important to see the questions used to measure the relationship between the effective Teaching of Teachers, Self-Regulation, and Study Habits.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The quality of the language in this manuscript is clear and simple for scholarly communications</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
