Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ul style="list-style-type: none"> • My comments about the manuscript entitled "Effect of feeding diabetic rats on breadsticks fortified with psyllium seed powder", are as follow: • The manuscript important for scientific community is fair enough, • The title of the article is suitable, according as the authors suggested in their research. • The abstract of the manuscript could be improved to be more comprehensive. At the end of the abstract section, authors have to replace the word: "products". • The subsections and structure of the manuscript have to be upgraded. The keywords section, I suggest to replace the words "Diabetes", "Plantago ovate seeds" and/or "bread sticks" by "Sensory evaluation", "Chemical analysis", "dietary fiber", or other keywords to improve the scope of your research in the scientific websites databases. • The introduction section has to include new references and them have to be improved. For the materials and methods section, I suggest to include better analyses. The discussion section has to be contrasted with new references. In the conclusion section, what about the future work in your research? • About the question, do you think the manuscript is scientifically correct? The answer is yes, I do. Nevertheless, can be enhanced. • The references have to be improved, there are not adequate and there are not recent. • About the "sensory evaluation" analysis, did you apply parametric or non-parametric analysis? Why did you use one technique and not the other one? 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<ul style="list-style-type: none"> • The English language quality of the article is fair for scholarly communications. 	
<p>Optional/General comments</p>	<p>The manuscript entitled "Effect of feeding diabetic rats on breadsticks fortified with psyllium seed powder" is well organized but some proposed changes should be done. Some details in the manuscript, discussion and conclusion sections should be completed. In my standpoint, is accepted with major revision</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
