

Editor's Comment:

The Research article shows new kind of surgeries as a result we can reduce the death mortality.

-
- The title is suitable for the article.
- The abstract is too long so needs to be summarized more with the definition of abbreviations.
- The subsections of the manuscript are appropriate.
- The manuscript is scientifically correct and essential.
- The references is 32 . It is sufficient and recent.

I found the paper is good written, and the topic is relevant to the journal reader.

- References is 32 but should be revised and aligned to the correct author (e.g., references 21,22,23,24,25,26 were not correlated to the correct authors)
- Abbreviations of some terms like (CHD, GCS, DM, and MABP) should be defined for the reader or be in the appendix
- **Minor revision**
