Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript titled “Review of COVID-19 Management Guidelines” is interesting, promising, and well-written. The article reviews the guidelines for the management of COVID-19 given by ICMR, Ministry of Health, India, IDSA, WHO, and NIH and provides a comparison of various aspects. However, I have the following observation and requests:</p> <ol style="list-style-type: none"> 1) Request authors to rewrite a few sentences of the abstract section. Rewrite these sentences “Although various protective measures such as quarantine from confirmed and suspected cases, nationwide lockdowns, etc., have been implemented in all the affected countries, to contain the spread of the virus, there is a dire need to develop effective therapeutic strategies to stop the spread of the disease and minimize its high rates of morbidity and mortality especially considering the rapid evolution of the virus giving rise to different variants. Several COVID-19 management guidelines have been eventually published by various well-known Indian organizations such as the Indian Council of Medical Research (ICMR) and the Ministry of Health (MoH) India and International organizations such as the Infectious Diseases Society of America (IDSA), National Institute of Health (NIH), and WHO. Other countries such as China, South Korea, Brazil, and Haiti, etc., have also published their own general public guidelines and healthcare professionals’ (medical institutions) guidelines for the management of COVID-19.’ 2) Request authors to work on improving the obvious grammatical and syntax errors in the entire manuscript. 3) Describe the abbreviations within the manuscript. 4) If possible include a new section discussing the uses of natural products in the management of COVID-19. 5) Write the discussion and conclusion sections separately. 6) Request to cross-check references. Also include more references with more research. 	

Review Form 1.7

Minor REVISION comments		
1. Is language/English quality of the article suitable for scholarly communications?		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
