

Editor's Comment:

I have gone through the manuscript files and noticed that below-mentioned remarks by reviewers are left unanswered by the authors.

1. As suggested by the reviewer, there should be a subsection of Statistical analysis and need some description. A single phrase is not enough.

2. I found the references sufficient, but not recent. 9/56 references are from the last 10 years, so less than 20% of the references are recent. I would suggest changing this for at least 50% of recent references.

Besides these, I have pointed out several English written mistakes Authors should resolve all these queries before its acceptance for publication.
