(If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	It is a well known fact that smokeless tobacco, or etc habit causes oral leukoplakia yes Yes few points were not cleared in the study, like homogenous or non homogenous leukoplakia was included or other types included their number of subject nit mentioned. yes Fine, but most of them were old. Could have included more recent studies. Study is good, but prevalence could be better if u have included region, area or state, prevalence in what sense, oral common on males is known fact, different brands or people include lime with tobacco or mixed form of tobacco, or this form of smokeless tobacco cause more oral leukoplakia. Forms of tobacco sin smokeless, and types of leukoplakia, and how many turned into non homogenous or how many treated successfully	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Clean and simple	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
