PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Yes for question 1-6. There are a few problems need to be addressed: Lack of Proper Attribution: The article lacks proper attribution for the information provided. Although some sources are cited in the text, there are no references provided at the end of the article. This could make it difficult for readers who want to follow up on the information or verify the accuracy of the information provided. There should also be consent forms provided by the subject (or parents for underaged subjects). Lack of Follow-Up: The case presented in the article ends abruptly, without any information on the child's long-term outcome or whether the treatment was successful.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	Overall, the article provides useful information on MIS-C as a potential complication of COVID-19 in children, but it could benefit from more detailed explanations, proper attribution, and more follow-up information.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
