Title of the Manuscript:	DETECTION OF B1 GENE IN TOXOPLASMOSIS USING PCR AMONG PREGNANT WOMEN ATTENDING ANTENATAL CLINIC IN KADUNA STATE NORTHWEST NIGERIA.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There are many typos, grammatical errors, and statement clarifications (conclusions) that need to be addressed in the manuscript, especially in the abstract. There was an error in the number of pregnant women screened in the study (349 vs 357). The author would benefit from a native English speaker to proof read the manuscript before submitting for review. In addition, the figures need to be improved. A ladder needs to be added to the figure. The work has merit as it bring awareness to antenatal care and <i>T. gondii</i> prevalence in the area. The author should make the necessary revisions and resubmit the manuscript for review.	
Minor REVISION comments	Proof read the manuscript for clarity. Double check the references at the end. There are many typos. Add doi web links.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
