PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> - Please structure your abstract as follows; background, aim, methodology, results, conclusion and recommendations. - COVID 19; late 2019 - Your introduction is fair - The methodology should or must include; a study design, setting, study population sample size, data collection tool and procedure, validation, data analysis and management etc. - The first 2 paragraphs of the methodology should be moved to the introduction. - Results are shallow - No recommendations - No limitations <p>From a professional standpoint I think the article needs major revision. A control facility should be introduced to ensure that the reduction in ATP is not by chance Also include secondary outcomes like nosocomial infections References are not sufficient. Please add Was there a significant drop in the level of ATP; which statistical test did you use What level of ATP poses significant risk of infections?</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
