

Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_93125
Title of the Manuscript:	Application of UV-Visible Spectroscopy in Kinetic Study of Molybdate Complexation Reactions and Analysis of Phosphate Levels in Fertilizers
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajocs.com/index.php/AJOCS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is necessary to do proof reading regarding the English used, I have corrected some of the writing using grammarly. It is necessary to add an image related to the complex formed. Why is it necessary to compare the phosphate test on inorganic fertilizers and organic fertilizers? Everyone already knows that organic and inorganic fertilizers are different. I think you only need to discuss the kinetics of the reaction. If possible, it is better to discuss the validation of the analytical methods used, such as precision, limit of detection, linearity, accuracy, and measurement uncertainty. Please more describe about kinetic profile related to the wavelength and the complex formed	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
