EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. Based on the revised paper, needs to write clearly research novelty and reason using Annona muricata. It needs more quantitative data to describe the reason for using this plant.</p>	<p>The authors have already stated in the introduction that, Annona muricata is a multipurpose tree whose existence is being threatened as a result of high demand of the species for its numerous benefits to mankind which includes food, firewood, medicinal purposes etc, also indiscriminate cutting down of trees and peoples lack of interest in planting A. muricata trees also pose risk to the existence of this species. This was further justified by stating that A. muricata has a recalcitrant seeds which easily loss viability upon contact with direct atmospheric air, and also has poor early growth and development. However , there is no singular reason for choosing this species by the authors , other than there collective decision and choice based on the reasons and justifications stated above.</p>
