PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>I want to thank the journal team for invitation and giving the opportunity to review this the reviewed article. The authors have tried to review "Malnutrition Among Children Under Five Years in The Era Of COVID-19 Pandemic In Sub Sahara Africa: Causes and Impact" in a good manner, however, there are some sections to be rearranged.</p> <ol style="list-style-type: none"> The manuscript itself is important for the scientific community, however, the authors failed to make it sound able. The Covid-19 pandemic is known and had many effects on Malnutrition among Children under Five Years. But, the authors did not scientifically touched it rather putting the result. To address this comparative and retrospective cohort study designs may be used. The title is suitable, however, better if it be " The impact of COVID-19 Pandemic on Malnutrition Among Children Under Five Years In Sub Sahara Africa" Partially comprehensive Yes The authors did not more discussed scientifically, they put the result simple way, the result is not in line with their title in area and time (that is the result included studies out of sub Saharan Africa and studies done before the era of Covid-19 respectively) and the discussion way is poor. The reference should be rearranged to a correct form of Harvard citing system. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The scholar communication is poorly described.</p>	
<p>Optional/General comments</p>	<p>Listed above</p>
