General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrrga.com/index.php/AJRRGA/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The paper says it was a prospective study and the clinical information has been obtained from patients but do not discuss protecting the confidentiality of the patients and their consenting process. It is more important considering the ethical values of the study. Please do submit the ethical approval copy for this study	
Minor REVISION comments	<ol style="list-style-type: none">1. The paper is well presented but in most of the sentences Hepatitis is written as hepatitis, please make sure the spelling of Hepatitis is always written with the first letter in caps mode.2. The findings showed that it is purely a descriptive paper rather any interpretive needing a statistical software. Any light on justifying the usage of SPSS software in this paper is not found.3. SGOT and AST, SGPT and ALT are the same, so it is advisable to use any one of them or separate them with a slash such as SGOT/AST4. Conclusion could have been a broader one and needs grammatical corrections of the sentences	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
